PROFILE

Dynamic Frontend Developer with 6 years of extensive experience crafting high-quality web applications and enhancing user experiences. Proficient in modern frameworks like Vue.js and React, showcasing expertise in responsive design and component development. Strong background in database management and performance optimization, ensuring seamless functionality and superior web vitals.

WORK EXPERIENCE

Softsvit, Kyiv

2021 - PRESENT

Frontend developer (Vue)

- Accelerated front-end development and deploy by implementing vite
- Revamped the legacy component system library by introducing a new architecture and principles,
- Developed and maintained SSR, SSG, and SPA applications.
- Implemented new business-driven features and modules.
- Built custom UI components (calendars, widgets, tables, sliders, forms) for internal business solutions.
- Designed and maintained CRUD-based systems and data workflows.
- Diagnosed and resolved front-end and back-end bugs of varying complexity.
- Optimized application performance and improved web vitals.
- Conducted code reviews and provided technical mentorship.
- Delivered responsive, adaptive layouts with cross-browser compatibility.
- Collaborated with cross-functional teams to ensure timely and high-quality releases.
- Contributed to system architecture improvement.
- Acted as a mentor for junior-level developers, conducting code reviews and technical training sessions.
- Migration Vue2 on Vue3
- Migration app Javascript on Typescript

SmartMade, Kyiv

2020-2021

Frontend developer (React, Vue)

- Developed layouts for Single-Page Applications (SPA) with dynamic component integration and redesign.
- Implemented routing, data filtering, sorting, search functionalities, and form handling.
- Optimized UI responsiveness and performance.
- Integrated state management using Redux (React) and Vuex (Vue).
- Worked with MySQL for database operations and data structuring.
- Connected and configured online payment gateways for secure transactions.

- Developed full-scale websites and landing pages for international exhibitions.
- Created new projects and enhanced existing applications with additional functionality.
- Performed data processing, UI/UX redesign, and component extension.

EDUCATION

M.P.Dragomanova, Kyiv

2013 - 2017

Bachelor's diploma, Faculty of Physics, specialty
'Physics and Mathematics',

M.P.Dragomanova, Kyiv

2017 - 2018

Master's diploma, Faculty of Informatics, specialty
'Computer sciences'

PROJECTS

Schedule AppResponsibilities:

- Created a web application based on Nuxt.js (SSR) to manage and display user event schedules.
- Implemented timezone selection, event creation, editing, deletion, and multi-select actions (batch operations via checkboxes).
- Provided full i18n localization support and optimized UX with real-time UI updates.

Tech stack

Nuxt 3, NuxtUI 3, Pinia, TailwindCSS, Day.js, i18n

Movie AppResponsibilities:

- Developed a full-featured movie catalog application with user authentication, localization, dynamic search by title, and advanced filtering by genre, year, and popularity.
- Enabled users to share filtered movie results. Built detailed movie pages displaying comprehensive movie information.

Tech stack

React, Redux Toolkit, TypeScript, i18next, Styled Components, Material UI

DropCRM PlatformResponsibilities:

- Utilized Vue Query for efficient and reactive data fetching
- Ensured robust and scalable form handling with VeeValidate.
- Managed global application state using Pinia with a clear modular structure.
- Integrated backend services and real-time features via AppWrite.
- Wrote maintainable and type-safe code using TypeScript, adhering to best practices for long-term scalability.

Tech stack

Nuxt 3, Typescript, Pinia, Appwrite, VueQuery, Veevalidate, Appwrite
